Goals

How deeply do you want to work together?

Ask yourself: which works best for your situation?

- Minimal levels of cooperation—some efforts to provide help to the other jurisdiction so that both operate more efficiently
- Full cooperation—the organizations work together so that they each operate at maximum efficiency, but operations are completely independent.
- Collaboration—jurisdictions actively seek to help the other operate better through some interactive efforts
- Co-creation - working together to create systems and tools to maximize results for each through joint efforts at all possible levels
